Brief History of ENERGY STAR & Power Management

- Technical possibility: Laptop   Computer

- Create Program: Specification development

- Launch

- Shipping enabled

- Expand to Printers, Copiers, etc.

- Global Partnerships

Brief History of ENERGY STAR & Power Management (cont d)
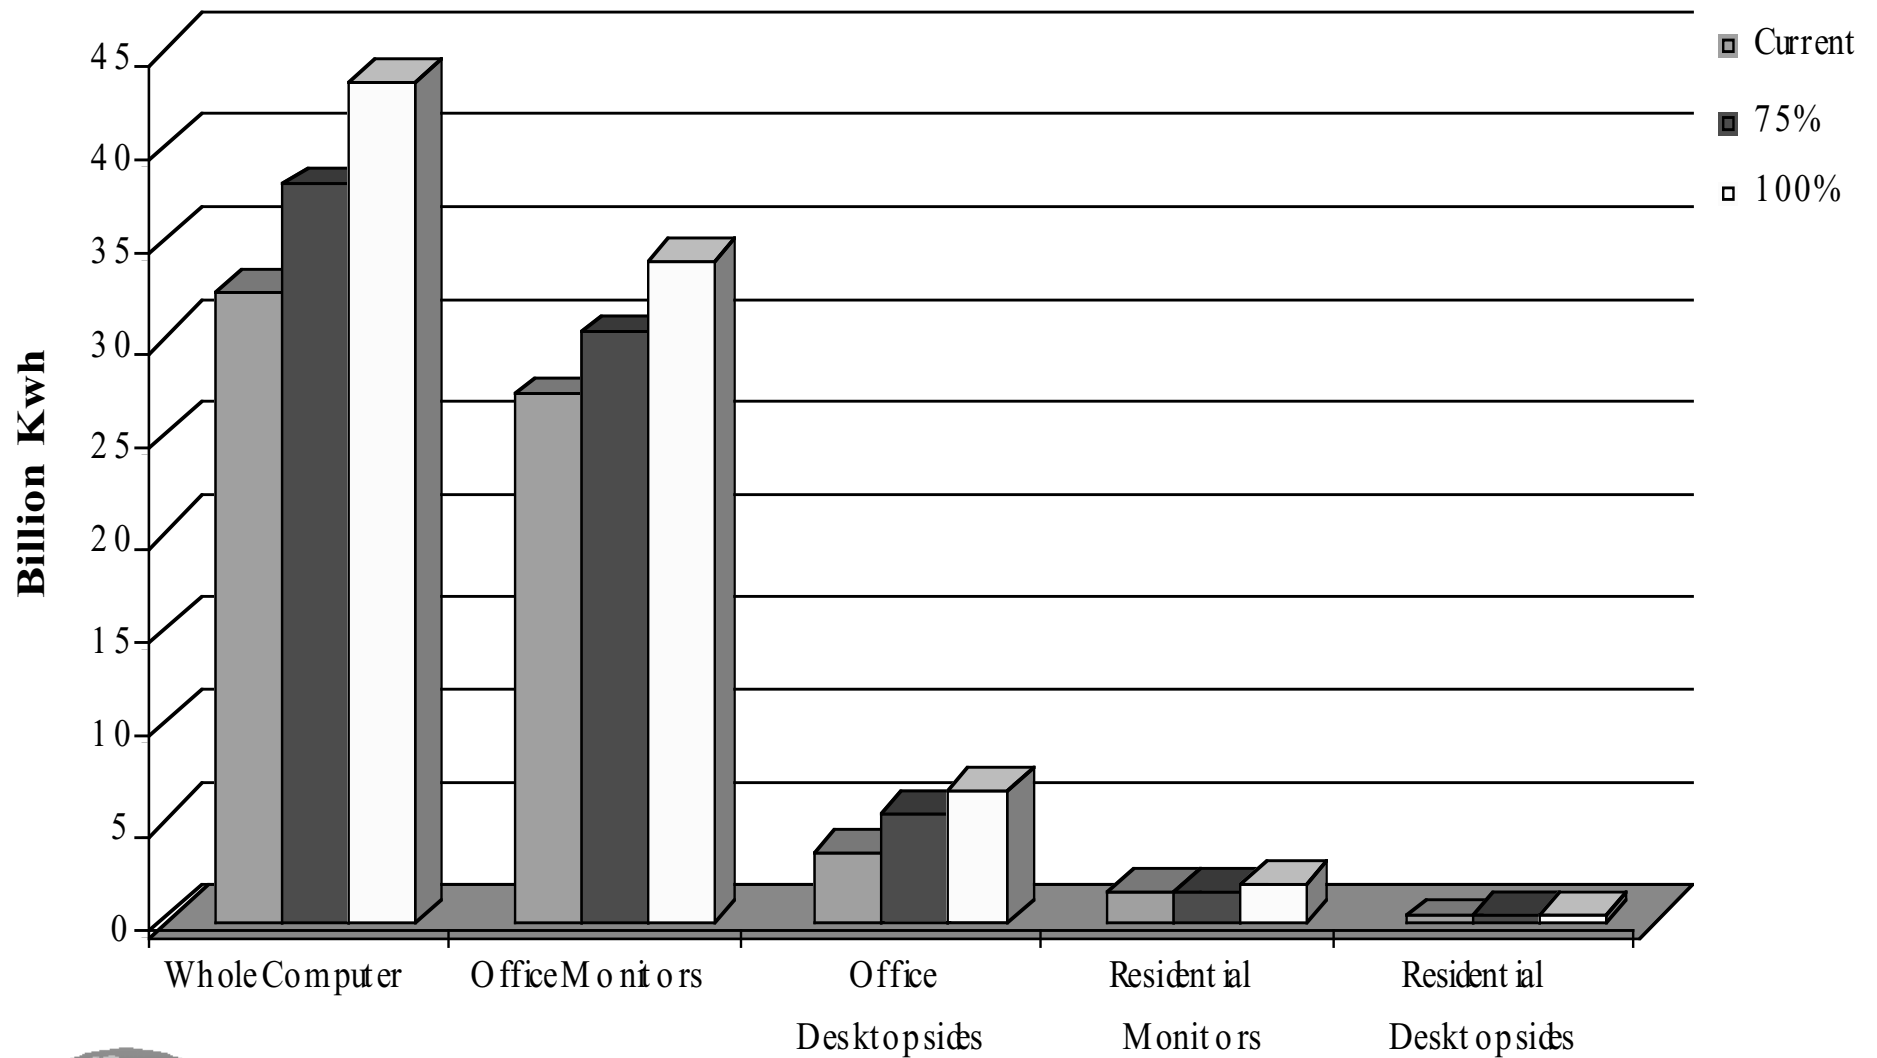

- Networking maintain Power Ma nagement

- Reducing power levels (25% threshold)

- ACPI move from BIOS to OS

- Power Management controls (transparent, seamless)

now

- Increase Enabling Rates

- European Partnership

Energy Savings (2001)

Carbon Savings (2001)

Million Metric Tons Carbon (y-axis)

Y-axis values: 9.0, 8.0, 7.0, 6.0, 5.0, 4.0, 3.0, 2.0, 1.0, -

Legend:
- Current
- 75%
- 100%

Categories: Whole Computer, Office Monitors, Office Desktopsides, Residential Monitors, Residential Desktopsides

Energy Bill Savings (2001)
